

These color chips represent shades of Integral Colors based on medium tone gray Type I-II Portland cement with 4" slump. Use this chart as a guideline only. The colors may not exactly represent the final color. Shade variations of cement and aggregate ply variations in the volume of water, the addition of admixtures and other additives may have an effect on the design mix and final color. We always recommend that a test slab be poured and approved prior to the start of the job.
